Apollo+ Series

The best downloadable PAT testers on the market.

Our world beating NEW **Apollo**+ Series now comes with improved functionality and accessories, including an external rechargeable battery pack and the ability to scan and print QR codes.

Straightforward PAT testing with simple data management
Following in the footsteps of Seaward's long line of trusted PAT testers, the Apollo+ Series offer a comprehensive suite of electrical safety tests to enable any workplace appliance to be tested. The Apollo+ also enables point to point testing of fixed appliances as required by the 4th edition of the IET Code of Practice.

Risk-based PAT testing
The Apollo 600+ and 500+ have a built-in electrical risk assessment tool that can be used to easily determine a risk-based suggested retest period in line with the IET 4th Edition Code of Practice. For users who are responsible for recording other non-electrical tests or inspections such as fire extinguishers or ladders, the user-configurable test function enables this.

Visual evidence for full traceability
Apollo 600+ has a built-in digital camera enabling images taken during visual inspections and risk assessments to be tagged against records in Seaward's PATGuard 3 software as evidence - making it the most comprehensive and traceable record-keeping system.

Why buy the new Apollo+ Series?

> Large on-board storage
> High definition colour display
> Remote data transfer from field to office
> Fixed appliance (point to point) testing
> User configurable tests- for non-electrical tests and inspections e.g. fire extinguishers and PPE
> Optional additional battery for extended operating time

Apollo+ Series Users:

> Professional PAT Testers
> Electrical Contractors
> Facilities Managers
> Operations Managers

Apollo+ Series

The best downloadable PAT testers on the market.

Total health and safety management
Apollo 600+ features a built-in universal risk assessment tool allowing hazards to be recorded, risk scores to be calculated and corrective actions to be planned and documented easily. For those who have responsibility for health and safety inspections outside of portable appliance testing, the Apollo 600+ also hosts onboard reports for fire detection and emergency lighting - making it an all-in-one solution for the future of health and safety management.

Superb software for total traceability
Apollo+ Series instruments have large internal memories capable of storing either 50,000, 10,000 or 2,000 records (600+, 500+ and 400+ respectively) and an additional 2,000 images (600+ only). Their compatibility with Seaward's PATGuard 3 software means that complete test records, including images, can be easily managed on a PC.

Easily transfer data to a PC remotely using Apollo Bluetooth function and a compatible mobile phone or tablet; or download results onto a USB flash drive (600+ only). Alternatively, transfer data directly using a USB lead when back at the office. Once downloaded to PATGuard 3, it is easy to keep track of the history of test and inspections, produce reports, certificates and invoices – offering total peace of mind and quicker, easier management of scheduling inspections and tests.

Time Manager 3 is an exciting software package, now included with PATGuard 3, and provides clear time management facilities. It's ideal for companies that manage off-site or remote testing staff and need to manage their business in a time efficient manner. It runs as part of PATGuard 3 software and provides clear graphical information on the user's activity such as number of tests taken, and time of tests.

Scan and print QR codes
Seaward's new QR code data system allows more data to be stored in your PAT label barcode including; Asset ID, site, location, last and next test dates. Using Seaward's Test n Tag Elite 2 printer you can now print labels that include our unique QR data code, the Apollo 600+ and 500+ have the ability to read the data contained in the code via our new Bluetooth 2D Elite barcode scanner and populate the fields automatically for quicker retesting without the need for data upload.

With our new QR DATA Viewer app (available for both Android and iOS devices) you can share these benefits with your customers - the app allows end users to scan the labels and see the test information, they can then very easily share the data via email. This functionality allows duty holders and end users to keep better track of faulty items.

Electrical Test Functions:

> Low current earth continuity test (with Zap circuit) guaranteeing accurate measurement

> Insulation resistance

> IEC lead test

> Protective conductor current

> Touch current

> Load power/current

> Alternative leakage current

> Point to point testing of earth continuity and insulation resistance

> RCD test

> Power socket test

DESIGNED & BUILT IN GREAT BRITAIN

Apollo+ Series

The best downloadable PAT testers on the market.

Apollo 600+

Apollo 600+ revolutionises safety management, with a built-in risk assessment tool for any workplace hazard and a variety of testing and inspection reports including portable appliance testing, fire detection and emergency lighting; Apollo 600+ offers an all-in-one solution to managing a risk-based approach to health and safety in any workplace, reducing the burden and ensuring compliance.

For complete traceability of results, including proof of visual inspection, the Apollo 600+ features an on-board camera, allowing photographs to be stored alongside risk assessments and other test and inspection data.
Apollo 500+

A great value 'plug and play' PAT tester with a comprehensive range of tests and advanced data transfer and storage features.

Designed to enable simple, professional and fast PAT testing, with remote data transfer, USB upload/download and a memory to store up to 10,000 complete test sets.

With point-to-point measurement, fast boot-up and a risk-based retest calculator to quickly determine suggested retest periods, Apollo 500+ is the ideal companion for high-volume testing.

Apollo 400+

A comprehensive range of electrical safety tests ensure compliance with the IET 4th Edition Code of Practice, whilst remote data transfer and USB download makes data management easy and efficient.

The Apollo 400+ is ideal for mid-volume PAT testing where detailed records are required.

Streamline the PAT testing process further by using the Apollo 400+ with a compatible label printer, barcode scanner and PATGuard 3 software.

Apollo 600+
Key Features:

> On board colour camera with flash

> Store 2,000 images

> Store up to 50,000 appliance records

> Ability to use (2D) QR codes

> Built in universal and electrical risk assessment tools

> Additional health and safety certificates

Apollo 500+
Key Features:

> Store up to 10,000 appliance records

> Ability to use (2D) QR codes

> Built in electrical risk assessment tool with suggested retest period calculator

> User configurable tests - for non-electrical tests and inspections e.g. fire extinguishers and PPE

Apollo 400+
Key Features:

> Store up to 2,000 appliance records

> Printer Compatible

> Point to point measurment (Rpe & IR) - needs optional accessory

> 25 User configurable electrical test/visual inspections sequences
